LCD LECTERN

Put logos and ideas right where you want them with our distinctive LCD Lectern. It prominently displays a 40" LCD screen that can be mounted horizontally or vertically. It is typically operated from a dedicated computer and gives high-status visibility to company and association logos. This attention-getter also supports video. Screen imaging can be animated to varying degrees to cater to any budget or taste.

Most importantly, the lectern has particular appeal for sponsors because it makes their presence very high profile during the event, and puts their brand at center stage for event photo or video documentation.
